

## Available prints and price list, 2023:

### Halophilic 2 (On a Molecular Level)

#### Halophilic 2 prints

Edition size for all prints in these series is limited to three per dimension (for example, three each at 12" x 16", 16" x 20", and 20" x 24") plus artist's proof. Any prints smaller than 12" x 16" are considered open edition. Prints at scales larger than those listed are available by commission.

**Archival inkjet prints:** Conventional prints are sold unmounted on heavy high-gloss paper. DisplayTrans material is recommended for display in lightboxes. I do the printing for this series myself, and those larger than 12" x 18" are printed at Silver Eye Labs in Pittsburgh PA.

12" x 16" to 12" x 18": \$350

16" x 20" to 16" x 24": \$600

20" x 24" to 20" x 30": \$700

**Acrylic face-mounted prints:** These are produced by Bumblejax in Seattle WA, and are archivally stable. Prices include Cintra backing and 1/4" acrylic with polished edge. Metallic papers are available. Hanging cleat will be provided, unless you plan to have the print professionally framed floater-style (which I recommend and can facilitate).

12 x 16" to 12" x 18": \$500

16" x 20" to 16" x 24": \$800

20" x 24" to 20" x 30": \$900

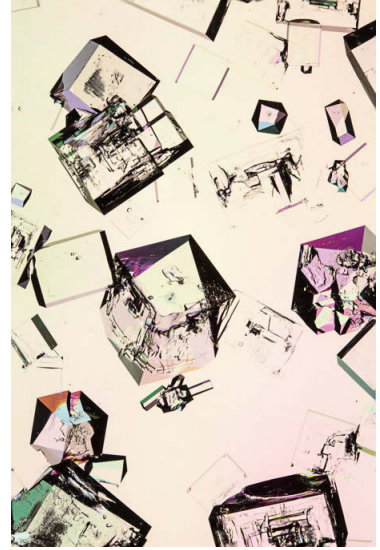

**Commissions:** The fluid nature of these compositions makes them excellent options for mural-scale architectural treatments, particularly for walls of non-standard shapes and proportions. Please contact me to discuss possibilities for commissions of this kind. I can also facilitate the production of lenticular prints at custom dimensions.
